Overview

The Lucidity Plugin for Milestone XProtect has been developed to give operators easy access to change content on the video wall, either by swapping sources or by changing presets, without giving them access rights for the full Lucidity Wall Manager GUI.

The UVS Lucidity video wall controller technology brings a multitude of additional features and benefits to Milestone XProtect users including:

- ✓ Wide range of data sources can be connected for display on the video wall in addition to IP video streams
- ✓ These include web pages/URLs, workstation sources via HDMI and via network connectivity e.g. RDP/VNC, message box data for informing operators of key information, RSS feeds and virtual machines
- ✓ Video wall layouts can include multiple sources images per display and/or single source images across multiple displays or the whole video wall
- ✓ Reduced amount of high-cost PC hardware to control the video wall
- ✓ The Lucidity video wall controller technology is fully scalable with many options to suit the required video wall system size and budget

Lucidity control GUI within the Milestone XProtect client

Live, online
demos
available

We supply and install a wide range of display technology for use in 24/7 control room environments and other applications, including professional-grade LCD video wall screens, LED video walls and where applicable, the latest rear projection displays.

Our capabilities also include the selection and supply of video wall controller solutions, including UVS's own Lucidity brand, and other control room associated systems such as KVM and operator personal workspace solutions.

- ✓ Established since 2007
- ✓ Hundreds of completed installations
- ✓ Turnkey solution provided
- ✓ Annual support contracts
- ✓ Wide range of scalable solutions
- ✓ Live, online demos
- ✓ KVM over IP system
- ✓ Operator workspace solutions

Not only were they local to us, which mattered to us as a business, but they had a product that ticked all the boxes when it comes to functionality. The guys at UVS were really accommodating in terms of bringing our vision to life and we're really happy with the end result.
