THE ULTIMATE VISUAL SOLUTIONS
FOR ALL REQUIREMENTS.

Synectics

SYNECTICS

Advanced security and surveillance systems provider Synectics chose to work with Ultimate Visual Solutions when they completed a refresh and upgrade at their Sheffield HQ demonstration facility.

Synectics provides tailored solutions for industries where security and surveillance are critical to operations, including gaming, oil and gas, public space, transport, and critical infrastructure.

UVS and Synectics have worked closely together to deliver joint control room solutions for more than 16 years.

The project involved Synectics' Synergy security and surveillance software platform being fully integrated with UVS Lucidity video wall controller technology, which can now be demonstrated to joint system integration partners and end clients.

The new installation was made up of a 3x2 46-inch video wall comprising extremely narrow bezel LCDs, driven by a Lucidity WBC70 video wall controller.

A Lucidity 7-inch desk touch panel also provides fast and easy launching of video wall layouts during client demonstrations.

The system demonstrates the detailed integration between the Synergy platform and UVS Lucidity video wall controller technology, for displaying multiple IP camera streams, key workstation application data, website and URL data, such as key dashboards, message box data and information from remote workstations and virtual machines.

Synectics were delighted with the results.

UVS and Synectics have completed a wide range of security control room installations, in sectors including public space, government high security facilities and high security prisons. Both companies are also involved in numerous upgrades of existing client installations.

The original demonstration facility was installed in 2013 and it is a testament to the quality of the solution that it was still operational until the recent decommissioning.

David Aindow, Global Business Strategy Director

For further information on UVS and how to arrange an appointment at either our Burnley or London demonstration venue, [click here](#) or call **01282 606525**.

UVS (Ultimate Visual Solutions) provide turnkey solutions for all types of audio visual and visual display applications. Our projects range from a single display screen in a conference room to a multi-screen video wall system within a 24/7, mission-critical operation such as a Data Centre or Special Operations Room.
