FOR ALL REQUIREMENTS.**

Traffic Group Signals

Traffic Group Signals, part of The Traffic Group, manufactures and supports the traffic management industry's most advanced portable and temporary traffic signal products.

Its core mission is to provide customers with best-in-class traffic management solutions to make roadworks safer, greener and more efficient.

When Traffic Group Signals wanted to take the monitoring and efficiency of its installations to the next level it chose a video wall provided by Ultimate Visual Solutions (UVS).

UVS installed a video wall at Traffic Group Signals' new headquarters in Cheltenham which allows it to map all of its deployed traffic light systems across the country and manage and interact with them remotely to quickly resolve any issues.

It also displays IP video, giving it remote views of the roads and junctions where the temporary traffic lights are situated.

The UVS installation comprises a video wall made up of 3x2 55-inch displays with a narrow bezel and a UVS Lucidity video wall controller.

Traffic Group Signals is committed to leading the industry when it comes to making its products and installations as safe, efficient and environmentally friendly as possible.

We are delighted to have been able to work with the team there to help them remotely monitor their traffic management installations throughout the UK and help to improve efficiency.

For further information on UVS and how to arrange an appointment at either our Burnley or London demonstration venue, [click here](#) or call **01282 606525**.

UVS (Ultimate Visual Solutions) provide turnkey solutions for all types of audio visual and visual display applications. Our projects range from a single display screen in a conference room to a multi-screen video wall system within a 24/7, mission-critical operation such as a Data Centre or Special Operations Room.
